RESOURCE RESERVE RECOVERY PLC

STRATEGIC REPORT

For The Year Ended 31 March 2016

Principal activity

With the re-structuring that took place during the year, the company's principal activity has changed to a 'Crowdfunding Company Shell Generator'.

Restructuring and Review of the Business

The Company issued a Circular on 3 February 2015 setting out proposals for a corporate restructuring. These proposals were approved at the annual general meeting on 19 February 2015 and implemented following FCA and Court approval on 29 April 2015. As part of the restructuring, the company changed its name on 27 May 2015 from VSA Capital Group plc to Resource Reserve Recovery plc ('RRR') and made a special dividend in specie, comprising one ordinary share of VSA Capital Limited for each ordinary share held in Resource Reserve Recovery plc. This resulted in the separation of VSA Capital Limited from the Resource Reserve Recovery plc group.

With the restructuring, the intention is to generate revenue from the provision of shell companies that can then be utilised for a wide variety of new projects and businesses.

Review of the Year

Resource Reserve Recovery plc has reported a loss of £1,082,788 (all continuing operations) which includes an exceptional item, note 17, of £1,081,996 (2015 (all discontinued operations) - profit of £69,100).

With the market for deals continuing to be tough, the demand for the services provided by the company remains challenging. Nevertheless, the company has developed the ability to provide clients with additional shareholders and further transactions are anticipated.

Principal risks and uncertainties

With the restructuring the company's risk profile is substantially reduced. The main risk is the speed with which the new business can be developed.

Dividends

No dividends will be distributed for the year ending 31 March 2016.

Going Concern

After making appropriate enquiries, the Directors consider, at the time of approving the financial statements, the company has the resources and the pipeline of business to continue in operational existence for the foreseeable future. As a result of this view, the going concern basis has been adopted in preparing the financial statements.

We have nothing to report in respect of the following matters where the Companies Act 2006 requires us to report to you if, in our opinion:

- adequate accounting records have not been kept by the Company, or returns adequate for our audit have not been received from branches not visited by us; or

RESOURCE RESERVE RECOVERY PLC

NOTES TO THE FINANCIAL STATEMENTS

For The Year Ended 31 March 2016

1. General Information

RRR is an unlisted public limited company.

Prior to the restructuring and dividend in specie, its principal subsidiary was VSA Capital Limited. VSA Capital Limited is a member of the London Stock Exchange and is incorporated and domiciled in the United Kingdom under the Companies Act 2006.

2. Going Concern

The financial statements have been prepared on a going concern basis.

The Company made a loss for the year of £1,082,788 (2015: profit of £69,100). Following the restructuring and after making appropriate enquiries, the Directors consider, at the time of approving the financial statements, the Company has the resources and the pipeline of business to continue in operational existence for the foreseeable future. As a result of this view, the going concern basis has been adopted in preparing the financial statements.

These financial statements do not include any adjustments that would arise if the company was unable to continue to trade.

3. Significant Accounting Policies

Basis of accounting

The financial statements are prepared under the historical cost convention.

These financial statements have been prepared in compliance with FRS 102 - The Financial Reporting Standard applicable in the UK and Republic of Ireland and the Companies Act 2006.

Resource Reserve Recovery plc is a publically limited company (formerly listed on the AIM), limited by shares, incorporated in the UK and registered in England (registered number 04918684).

Revenue recognition

Revenue is recognised to the extent that it is probable that the economic benefits will flow to the Company and can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable in the ordinary course of the Company's activities. Revenue is shown net of VAT, returns, rebates and discounts. Stage of completion is determined either on completion of deals or in the period in which the services are provided in the case of retained work.

Interest is recognised on a time-proportion basis using the effective interest method.

Investments

Current asset investments are measured at fair value through Profit and Loss.

Taxation

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the tax authorities, based on tax rates and laws that are enacted by the balance sheet date. Income tax is recognised in the income statement unless it relates to items that are credited or charged to equity in which case it is also charged or credited to equity.

Deferred income tax is provided on all temporary differences at the balance sheet date between tax bases of assets and liabilities and their carrying amounts for financial reporting purposes, with the following exceptions:

RESOURCE RESERVE RECOVERY PLC

NOTES TO THE FINANCIAL STATEMENTS

For The Year Ended 31 March 2016

- where the temporary difference arises from the initial recognition of goodwill or an asset or liability in a transaction that is not a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss;
- in respect of taxable temporary differences associated with investments in subsidiaries, where the timing reversal of temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future; and
- deferred income tax assets are recognised only to the extent that it is probable that taxable profits will be available against which deductible temporary differences, carried forward tax credits or tax losses can be utilised.

Deferred income tax assets and liabilities are measured on an undiscounted basis at the tax rates that are expected to apply when the related asset is realised, based on tax rates and laws enacted or substantially enacted at the balance sheet date.

Share based payments

Certain employees and Directors of the Company receive equity settled remuneration in the form of Company share options. The fair value of the employee services received in exchange for the grant of the options is recognised as an expense to the income statement on a straight line basis over the vesting period and a corresponding amount is reflected in the profit and loss reserves in shareholders' equity adjusted at each balance sheet date to take into account actual and expected level of vesting. The charge is calculated as being the fair value of the shares or the right to the shares at the date of grant. Fair value is measured using a modified Black-Scholes option pricing model and is based on a reasonable expectation of the extent to which performance criteria will be met.

Exceptional items

It is the Company's policy to show items that it considers being of a significant nature separately on the face of the income statement. The Company defines the term exceptional as items that are material in respect of their size and nature.

4. Accounting Estimates and Judgements

The preparation of accounts requires the use of estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results may ultimately differ from those estimates. The key assumptions concerning the future and other key sources of estimation uncertainty at the balance sheet date, which have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below.

Valuation of trade receivables

In assessing the recoverability of trade receivables the Company uses historic performances to estimate likely future cash flows from contractual debt. Assumptions are required to be made about indicators of recoverability and any required provisions.

Factors affecting the tax charge

The tax assessed for the year is lower than the standard rate of corporation tax in the UK. The difference is explained below:

Profit/(loss) on ordinary activities before tax	(1,082,818)	69,100
Profit/(loss) on ordinary activities multiplied by the Standard rate of corporation tax in the UK of 20% (2015: 20%)	216,564	13,820
